Subject: Certified Taxable Values
Attachments: FY-2008 Taxable Value for Mill Levy.xls

Greetings from MACo,

Attached is an Excel spreadsheet showing the certified taxable value in each county for this year that was provided by the Department of Revenue. Please review the amount shown for your county with the certified amount provided to you by DOR. If you note any differences, please let me know.

Fifty-two counties saw an increase in their taxable value, while four saw decreases. In many of the counties having the largest increases, most of the increase is attributable to energy development and related infrastructure, and in others, the increases are primarily due to residential and business growth.

I am still waiting to receive the other amounts that must be considered for county classification purposes. As soon as this is received, I will enter the data to determine each county's class that becomes effective January 1, 2008. As a reminder, Section 7-1-2112 M.C.A. requires the county commission to make an order designating their county's class at the regular session in September of each year.

7-1-2112. Designation of county classification by county commissioners. (1) The several boards of county commissioners must, at their regular session in September of each year, make an order designating the class to which such county belongs, as determined by the taxable valuation of such county for the year in which such order is made, under and in accordance with the provisions of 7-1-2111.

(2) Such classification shall not change the government of the county then in existence until the next succeeding first Monday in January.

I look forward to seeing everyone at our annual conference in Great Falls. <<FY-2008 Taxable Value for Mill Levy.xls>>
